

Automatic tarpaulin high frequency welding machine

➤ Feature

This Automatic Mobile Welding model is specially designed for industrial canvas welding and large area of PVC welding, tarpaulin welding of big size products

The machine equipped with incredible High sensor electronic protection system with which the mould and material are perfectly protected

The Output of High Frequency is in compliance with international Radiation standard which avoids any harm to human body

Automatic slider driving the welding sect by sect in bench in precision

Mini electromagnetic valve can self-tuning the high frequency for best output performance

➤ Applications

for welding tent, PVC tarpaulin, ceiling, truck cover and printed advertisement canvas conjunctions, awning, canopy, sunshades; and all kinds of canvas products welding

Parameter	
Model	KLR-8KW-CB
Power	8000W
Power supply	3 Phase 380V
Input power	15KVA
Rectifier	Silicon Diode
Vibration tube	7T69RB Toshiba
Frequency	27.12MHz
Spark protection	5557
Max. gap of electrodes	50MM
Up electrode	800*25mm*N
Down electrode	6000mm*N*500mm
Operate style	Pneumatic
Time adjust	0-10S adjustable
Working table	12 meter
